

Starters for STEM

Starters for STEM are ten activities that parents can use at home to help children develop their science, technology, engineering and maths skills. These activities are easy-to-resource and provide children with the stimulus to talk about the world around them.

Follow the link below to discover a wide range of activities which I think you will enjoy at home.

<https://www.stem.org.uk/home-learning/primary>

There are five different collections which are being regularly updated:

Cross-curricular activities

Science activities

Maths activities

Computing activities

D&T activities

In fact, I'm so impressed by these resources I think we will be using some of these ideas to support our learning once we are together again. Look after yourselves and bye for now.

Mr. Cross
