

Teacher's Instructions
 A game for two or more players. Each place a counter at 'start'. Take turns to throw the dice, and move your counter a matching number of spaces. If you land on a number in the x6 table, jump forwards to the next number in the x6 table. If you land on a number in the x7 table, jump backwards to the previous number in the x7 table. The winner is the first to reach 'finish', and x7 table throw the dice again. © Colour the sixes and sevens in different colours. (One number will be more than one colour. What is it?)
