

Particles are closer together in a gas, compared to a liquid.

Particles are closer together in a liquid, compared to a gas.

**What do you think?**

I think a wooden spoon is safe for cooking, because it won't conduct heat.

I don't think I'll use a wooden spoon for stirring hot food, it could catch fire.

**What do you think?**

An insulator is a material which does not allow heat or electricity to travel through it.

A conductor is a material which does not allow heat or electricity to travel through it.

**What do you think?**

I think that water can only exist as a liquid.

I think that water can exist and change between being solid, liquid and gas.

**What do you think?**

More concept cartoons tomorrow.
