

Forces

Molly

Air and water resistance are both types of friction.

There is no friction acting on an object moving through water.

What do you think?

Rory

Friction is never helpful, it just slows me down!

Friction can be very helpful, like friction between my bike tyres and the road.

Sam

Levi

Molly

I won't skid on the icy roads because my new bike has got such grippy tyres.

It is important to clean and oil your bike chain; it reduces friction and helps the bike run smoothly.

What do you think?

Rory

A streamlined vehicle will move more easily because there's less air resistance.

The only way to make a vehicle faster is to give it a powerful engine.

Sam
