

Danger in the Rainforest

for 2 - 4 players

Can you help Cyril the squirrel monkey cross the forest with his family?

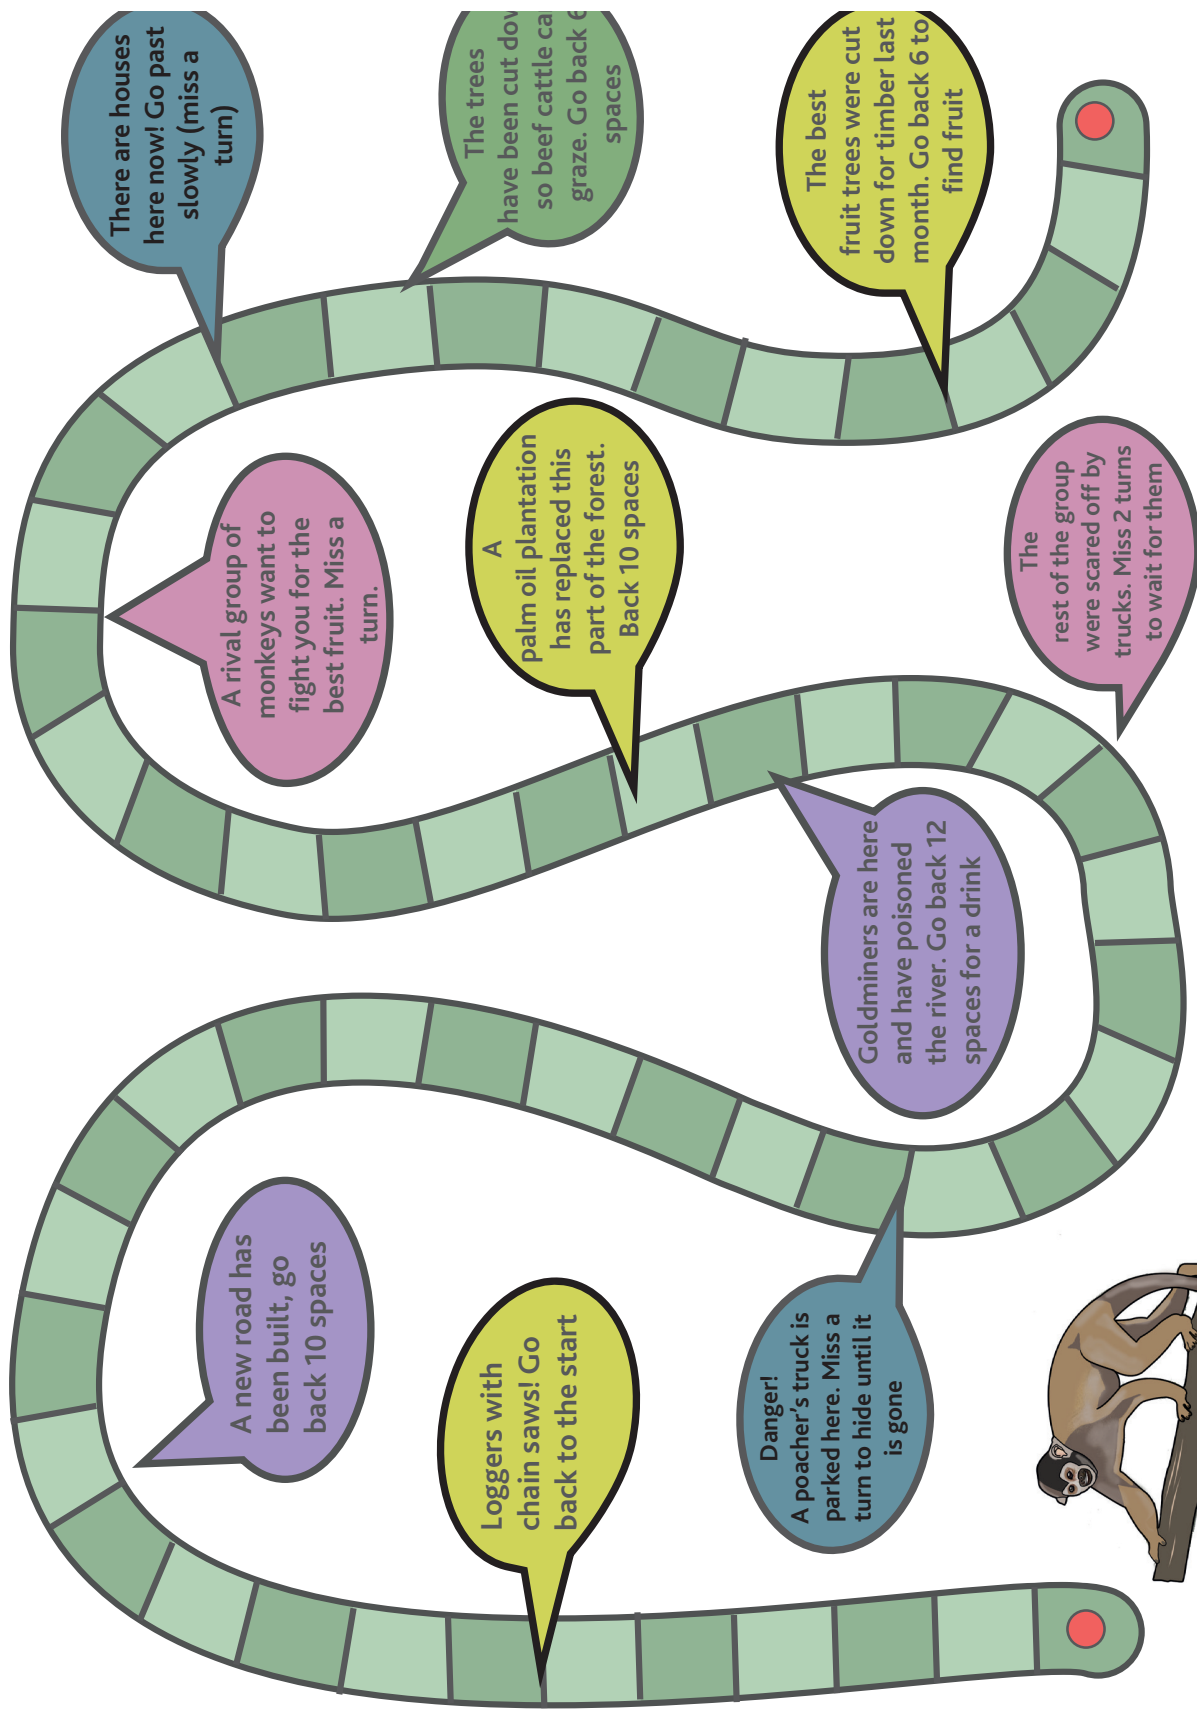

Monkeys are nimble and clever so they are good at leaping through the tree canopy.

So how hard can it be to cross an area of rainforest? Not difficult, surely?

But today's forest is full of danger for monkeys, and survival is getting harder.

Some monkey species are on the brink of extinction!

To play the game you will need counters (easy to make) and a dice. Begin on the red dot, throw the dice and off you go! Each player takes a turn.
