How We Hear Cut and Stick Activity

Cut out the labels below and stick them in the correct place on the diagram to show the parts of the human ear and how we hear.

coch	nlea !!	ear bones		pinna		ear drum
	auditory nerve		ear canal		air particles	

Cut out the labels and complete the flow diagram to explain how we hear sounds.

	The object vibrates.	Vibrations pass onto the ear drum.	Hairs in the cochlea vibrate.	A message is sent to the brain along the auditory nerve.	The air particles vibrate.	The ear bones vibrate.
