

Friday 16th April 2021

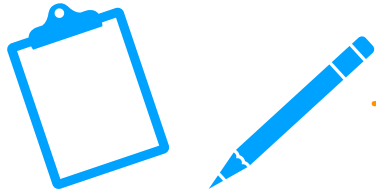

ONLINE LESSON

In this lesson we will:

- Today we will focus on science and the classification of living things.
- We will use some of the resources which have already been posted on the website to help us to learn more about animal classification. We will identify characteristics which enable us to classify invertebrates and vertebrates into smaller subgroups.
- We will take time to think about how animals can be classified according to what they eat and think about the interdependence of species as we look at examples of food webs. Also, how do plants produce energy and excrete waste products too?

(If time allows we will finish with a science quiz too. :-)

Sound switched "ON"

Your brain, as well as your 'Dhoon High 5' and 'Values'.

(I will not be setting any follow up challenges and suggested learning today. I just wish you all a great weekend and I look forward to seeing you all very soon. :-)
